Gitlab Repo Graph - Ryan Snyder

working_branch

Separated Testing document from DesignFlow. Adding a section for nonexistant sources.

Fixed minor bug with saving time entries.

Added the following:

DesignFlows, LocalDemoGuide, UserGuides. Multiple bug fixes, including documentation comments on most components and classes.

Final deploy script push, thank goodness.

Please don't make me comment this again.

I've also learned the importance of placeholder removal.

Professional message here - I'm updating this script again because I forgot how file traversal works.

Spam spam spam

Spamming the git graph with small changes.

More automated deployment tweaks.

Minor tweak to deployment script.

Testing deployment script

Another seeder update.

Minor styling fixes for consistancy, major DB seed changes to properly set up demo accounts.

Pre continuous integration prep

Preparing for deployment

Fixed project structure - frontend no longer lives inside of of the HourMap API project.

Added editing of user profiles, promoting of employees to managers, a loading interceptor for feedback, and a home page.

Additional styling. Minor bug fixes including times showing as UTC instead of local time.

Adding custom styling, including buttons and backgrounds.

Fixed convertIsoToDecimalHours to include days for long, long, shifts.
